Work experience

2018 **Apple, Inc - Siri International QA Lead, Cork & Cupertino.**

February - **Apple, Inc - Software & QA Engineer Intern, Cupertino (California, USA), 6 months.**

- July 2017
- Worked in a team of Engineering Project Managers, Quality Assurance Leads and International Creative Content Writers, focused on delivering Siri for our International markets.
 - Mainly focused on the QA Lead function and helped to coordinate the testing efforts for many Siri International features.
 - Leveraged a web application to automate, smoothen and strengthen the QA and EPM processes, resulting in an increase in performance and productivity in our team.
- Keywords: Quality Assurance, EPM, Java, Ruby, AngularJS, PostgreSQL, Hibernate, UI/UX.*

April - **Apple, Inc - Software Engineer Intern, Cupertino (California, USA), 5 months.**

- August 2015
- Worked in a team of Language Engineers responsible for delivering Siri features in different languages worldwide.
 - Built from scratch an internal web application, aimed at improving the workflow between Engineering Project Managers and Language Engineers.
- Keywords: MVC, Ruby on Rails, AngularJS, PostgreSQL, UX/UI.*

Diplomas & Education

2012 - 2017 **Diplôme d'ingénieur en Génie informatique, University of Technology of Compiègne, France, 5 years.**

- Master's degree in Computer Science, specialized in software design, UI/UX and human-computer interaction. *Keywords: OOP, AI, algorithms, data structures, database, data mining, art.*
- Bachelor's degree in Engineering and Human Sciences. *Keywords: Philosophy, tech history, economics, languages, maths, project management, innovation method.*
- Minor in Philosophy, Technology and Cognitive Science.

Spring 2014 **Erasmus exchange program, Technische Universität Braunschweig, Germany, 5 months.**
Keywords: Applied mathematics, Computer networks, C, Java, Interculturality.

Information Technology

School Projects (quentinkeunebroek.fr | [github/qkeunebr](https://github.com/qkeunebr))
